***Allowable Subject Matter***

1. Claims 1, 2, 7-9, 13, 18-20, 29, 30, 32-36, 44, 45, 47, and 49-52 are allowed.
2. The following is an examiner's statement of reasons for allowance: In the response of 6/13/2006, applicant proposed amending the specification and claims to clarify the fact that there are two separate networks interpenetrating each other; one is solely an inorganic network, while the other is an organic- inorganic network. Applicant argues persuasively that the material of Chandross et al fails to teach both networks, and solely teaches a hybrid inorganic-organic matrix, without a teaching or suggestion as to the additional inorganic network. Therefore, the rejection of record has been withdrawn. The examiner has performed an updated search of the prior art, but no new art has been found. It was noted that the copies of the two Cheben et al journal articles cited on the international search form had not been made of record although they had been considered previously. These are now made of record on the PTO-892 attached. Both references teach an inorganic-organic matrix with an organic matrix, not an inorganic matrix, therefore the instant claims are allowable over these references. For these reasons, the instant claims are now allowable

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amanda C. Walke whose telephone number is 571-272-1337. The examiner can normally be reached on M-R 5:30-4.
